FLORIDA HURRICANE WINDSTORM LOSS MITIGATION NOTICE FOR COMMERCIAL RESIDENTIAL PROPERTIES

When your policy covers the peril of windstorm and such loss occurs from a hurricane for an applicable commercial residential property located in the state of Florida, you may be eligible for a rate credit if specific loss mitigation features exist. These features can include required roof covering, roof deck attachment and other features.

Philadelphia Insurance Companies require proof, certified by a registered or licensed design professional, which substantiates the existence and acceptability of the loss mitigation features. You will be responsible for the expense associated with substantiating the mitigation features. Once acceptable proof is received by us from your agent, hurricane windstorm loss mitigation credits will be applied to your policy.

If you have any questions about hurricane windstorm mitigation features that could result in a discount, please contact your agent.
